(231 Central, Hot Springs, AR)

Physical Description

An attractive symmetry, finely wrought decorative details, and a sense of proportion characterize this handsome brick building with dressed stone facade on Hot Spring's main Street. The four-story rectangular structure with flat roof is capped by a parapet with urn-shaped balusters interspersed with plinths decorated with urns. The ground floor facade features large plate glass windows with multi-paned transoms; the transition from the ground level to upper stories is marked by a simple stone cornice. The three upper stories are characterized by ranges of single casement windows which grow shorter as they ascend and are decorated with correspondingly simpler details. The longer second story windows are enriched with decorative metal grilles at their bases rendering a balcony effect. The shorter windows of the second floor are underscored with decorative carved stone panels in a foliate and urn motif. The small windows of the top floor are underscored with simple recessed stone panels. Just beneath the parapet a decorative frieze appears which is enriched with foliate carvings of classical inspiration and a central panel inscribed with "Wade". Curved block modillions line the simple cornice. The double leaf oak door features plate glass panels and a neo-classical motif metal grille in the transom.

Statement of Significance

Designed in 1927 by the Thompson, Sanders and Ginocchio firm, the Wade Clinic on Central Avenue in Hot Springs is characterized by its finely tuned classical details. The four-story building features an unusually elegant sense of proportion. Delicate decorative details include carved stone panels above the second story windows, and a decorative frieze beneath the parapet which features urn-shaped balusters interspersed with plinths decorated by urns. The Wade Clinic presents a genteel appearance on Hot Springs' major historical thoroughfare.

- applicable criteria
- justification of areas checked
- relating significance to the resource
- context
- relationship of integrity to significance
- justification of exception
- other

The statement of significance does not explain why the building is considered significant within the theme of this nomination - it is more of a description rather than an analysis of why the building is considered architecturally significant. Please explain how this building fits into the theme, and why is it considered significant within the context of the firm's work
