## National Register of Historic Places Continuation Sheet

Section number 7 Page 1

---

Built at the same time as Lake Leatherwood Dam were two single story, wood frame structures: a bathhouse and an open barbecue pit. Both are covered with gable roofs and supported by continuous stone foundations, though the bathhouse features jerkin-head gables on each of its ends and a projecting, central entrance porch is covered with a hipped roof. The porch also features a stone foundation and its roof is supported on four pair of massive square posts set on stone piers. Its windows are twelve-over-twelve wood sash.

Both are located approximately a mile to the south of the dam, on the western shore. They both appear to be in excellent condition.

National Register of Historic Places  
Continuation SheetSection number 8 Page 1

The creation of Lake Leatherwood was but one of several projects carried out in Arkansas with the involvement -- or under the direct supervision of -- the Soil Conservation Service (SCS). Organized in 1935 during the first administration of Franklin Delano Roosevelt, the SCS owed its existence to President Roosevelt's vision regarding the threats posed to both the American landscape and American agriculture by erosion and outdated farming techniques that depleted the soil. Though the magnitude and seriousness of this problem was no more dramatically illustrated than during the dust storms of 1934 and 1935 that literally carried thousands of tons of drought-parched soil from the Great Plains states eastward, creating the infamous "Dust Bowl," the first incarnation of this federal agency was actually created a year previous with the establishment of the Soil Erosion Service, organized under the Department of the Interior. By 1935, Congress passed the Soil Conservation Act, formally establishing the Soil Conservation Service as part of the U.S. Department of Agriculture. In carrying out the various conservation projects with which they were charged, both agencies made use of Civilian Conservation Corps labor, with the SCS supervising as many as 454 CCC camps nationwide by 1936.

The Soil Conservation Service's legacy in Arkansas did not actually begin until 1937. In February of that year, President Roosevelt sent a letter to all state governors requesting the passage of legislation authorizing the establishment of soil conservation districts as political subdivisions of the state. The Arkansas General Assembly happened to be in session at the time, and Governor Carl E. Bailey's office drafted legislation to respond to President Roosevelt's request. On March 3, 1937, Governor Bailey signed the bill into law and by November of that year four soil conservation districts had been drawn and approved. Thereafter, SCS embarked on a number of conservation projects aimed at erosion prevention and soil enrichment throughout these initial four districts, with the construction of Lake Leatherwood premier among them.

The Lake Leatherwood Dam and Recreational Buildings were constructed by the Works Progress Administration under the direction of the recently-established Soil Conservation Service with Civilian Conservation Corps (CCC) labor. The work was commenced in 1938 and completed by 1940. The lake and the associated dam were constructed in part as a recreational project, the point being to create a fresh water lake for canoeing, sailing, fishing and swimming for the local residents; toward that end, the CCC also constructed the bathhouse and barbecue pit approximately one mile to the south, on the lake's western shore, as part of a picnic area. However, the Lake Leatherwood dam was also built as a soil and erosion control project, with the goal of preventing the continuing loss of woodland and potential housing sites at the northern end of West Leatherwood Creek.

Upon completion of the dam, the federal government leased the property around the lake to

Section number 8 Page 2

---

various members of the community. During this time the government then deeded ownership of the property to the city of Eureka Springs with the agreement that the property would always be opened to the public and never sold into private hands. Though local residents continue to lease the property (and therefore continue to maintain it) the dam and the buildings remain in the hands of the city. The picnic area is currently used for fishing, picnicking, camping and swimming.

EVALUATION/RETURN SHEET

REQUESTED ACTION: RESUBMISSION

PROPERTY NAME: Lake Leatherwood Recreational Facilities

MULTIPLE NAME: Facilities Constructed by the Civilian Conservation Corps in Arkansas, 1933-1942, MPS

STATE & COUNTY: ARKANSAS, Carroll

DATE RECEIVED: 6/29/92 DATE OF PENDING LIST:  
DATE OF 16TH DAY: DATE OF 45TH DAY: 8/13/92  
DATE OF WEEKLY LIST:

REFERENCE NUMBER: 90001942

NOMINATOR: STATE

DETAILED EVALUATION: Y

ACCEPT  RETURN  REJECT 8/12/92 DATE

ABSTRACT/SUMMARY COMMENTS:

These 2 buildings - a covered barbeque pit and a large and impressive bath house - are handsome and well-preserved examples of recreational facilities constructed by the CCC under the direction of the Soil Conservation System Service.

The concerns raised in the earlier return have been addressed.

The structures were constructed at the same time as the Lake Leatherwood dam, but are located about a mile south of it.
