The Phillips Farm  
Suffolk, Virginia

Narrative Description:

The Phillips Farm House is situated on a ridge (known as the Tidewater Escarpment) north of Chuckatuck, Virginia on Route 10. The Phillips Farm House, built c. 1820, is a square, two story house on an English basement. It is a gable-roofed, wood structure, measuring thirty feet by thirty feet. The original house was thirty feet wide by seventeen feet in length: one room to south of a north hall with  $\frac{1}{2}$  story above. In 1848, a thirteen by thirty feet addition was added to the west of the original structure (substantiated by dates on the chimney shoulder and beam in addition).

The current floor plan configuration is a  $\frac{2}{3}$  Georgian-plan: a north hall with two rooms to south, and a back porch, west of the hall, enclosed for kitchen. The story above, built as a clerestory, is a back hall with two rooms to the south and a bath to the east. The English basement is three rooms. There is one non-contributing building that sits southwest of the house. It is a  $1\frac{1}{2}$  story wood frame building.

Built on an English basement of five course American bond brick, the house sits five feet above grade. The house has two exterior brick chimneys on the south end. The brick work indicates that the original chimney containing three fireplaces has been raised. The date 1848 is etched in a brick, centered between the upper and lower chimney shoulders. The southwest chimney contains two fireplaces and appears of the same brick work as the raised portion of the old chimney. The house has a cedar shake roof installed in 1976 by a previous owner. Pictures of the house taken in the 1960s show a tin roof. Unique to the house are the nine clerestory windows which adorn the entire second story. These windows were added when the back of the house was added and the roof raised in 1848. A solid beam thirty feet in length forms the sill of the windows. Every other clerestory window slides to the south behind another window. The rear facade has a salt box roof with clerestory dormers at each end.

The facade of the house features an entrance in the north bay via a four-panel door at a one story porch on brick pillars, five feet above grade. The porch, built in 1982, replaces a Victorian porch that was added in 1940. That porch was two stories, wrapped around the entire east and south sides, and had a cupola above the porch roof.

United States Department of the Interior  
National Park Service

NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET

Section 7 Page 2

The Phillips Farm  
Suffolk, Virginia

The daughter of a previous owner stated that the back porch (which is one story with tin roof) was the original front porch which was moved to the back of the house when her father added the Victorian front porch in 1941. The 1982 front porch was designed with assistance from architects from the Colonial Williamsburg Foundation and is believed to be more appropriate to the period of the house.

The house has eight different window styles, four different mantel designs and different style doors on each of the three floors. First story windows on the facade are original nine-over-nine sash windows. The story above has the distinctive nine pane clerestory windows that run the entire width of the house.

The south elevation features six-over-six windows on the first floor, two-over-four in the second. The west side of the house has six-over-nine sash windows on the first floor and dormer clerestory windows in the story above. The north side of the house has a nine-over-nine sash in the original hall, six-over-six in the kitchen, and four-over-four in the story above. All of the basement windows are six-over-six sash windows which are approximately one foot above grade. All panes in the house are 8x10. All windows, as are all of the structural beams in the house, are marked with Roman numerals. The windows in the original part of the house had brass push button window locks (only one entire lock exists) that allowed the windows to lock at two levels and in closed position.

The original floor plan was single room to south of side hall with the same configuration for the ½ story above. The English basement was two rooms.

The current floor plan of the house is typical of the early to mid-nineteenth century period (floor plan attached) double pile configuration on an English basement. Structural evidence suggest that the entrance hall stairway originally ascended on the south wall of the hall to a north turn landing, crossed the back of the hall and ascended to the second story at a right turn. The current stairway ascends thirteen steps on the north side of the hall straight to the second floor (speculation is that this change was made in 1848 with the west addition.) The stairway has a round pine handrail with a balustrade consisting of square balusters and square newels with square caps. The passage hall features thirty-six inch high wainscoting with molded baseboard and top rail. Doors that are thirty-six inches wide with four panels have survived on the first floor with original Carpenter lock on the east entrance door. Wood NPS

CONTINUATION SHEET

Section 7 Page 3

The Phillips Farm  
Suffolk, Virginia

graining was found on the doors.

The first floor southeast room features six inch tongue-in-groove pine floor boards. The wainscoting is original, thirty-six inches high consisting of twenty-four inch pine plank seventeen feet long with chair rail and baseboard. The window and door trim is hand planed and is of the same design as the mantel. The mantel is original with side pilasters, molded central tablet and molded narrow shelf. Ceiling height is nine and one-half feet.

The southwest room, added in 1848, has six inch tongue-in-groove pine flooring, twenty-eight and one half inch high chair railing and baseboards with beaded edge. The mantel is original with side pilaster, molded central tablet and molded narrow shelf. Ceiling height is eight feet.

The kitchen, originally the west porch, was enclosed in the early twentieth century. It was renovated and modernized by the current owners in 1982. The deteriorated three inch tongue-in-groove flooring was replaced with eight inch pine tongue-in groove flooring. The window and door trim is molded matching that of the south west room.

The second story (floor plan attached) is accessed by a thirteen-tread stairway that rises from the north side of the first floor side hall to a small hall. There is one clerestory dormer facing west in the west wall of the hall. Flooring is tongue-in-groove pine. Trim in this hall consists of six inch pine baseboards. All doors on the second story were missing and have been replaced with five panel doors.

The northeast room was converted to a bathroom and has the same tongue-in-groove pine flooring as the rest of the house. All woodwork in the bath is simple six inch baseboards. Three of the nine clerestory windows are in this room.

The southeast room has random width tongue-in-groove pine floor boards ranging from eight inches in the center of the room to twelve inches. The east wall slopes from the top of the clerestory windows. Six of the nine clerestory windows on the facade are in this room. The mantel is a reproduction of the original mantel, burned in a chimney fire in 1994. It features side pilasters, flat central tablet and narrow shelf. Trim around windows and doors in this room is new flat six inch pine, as are the baseboards. Trim under clerestory windows

United States Department of the Interior  
National Park Service

NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET

Section 7 Page 4

The Phillips Farm  
Suffolk, Virginia

is original six inch pine with beaded edge.

The second story southwest room has the same trim as the southeast room with one clerestory dormer facing west. The ceiling slopes from a thirty-inch knee wall. Unique to this room is the tiny fireplace that abuts the west wall. The mantel is a copy, made in 1982, of the original in the front east room.

The English basement is accessed by a stairway directly under the stairway on the first floor. Structural evidence (a cut beam with patch work) suggests that it was not an original access to the basement. The pine treads are very worn and suggest an age greater than that of the first floor treads. The handrail is oval and the steps are a double-run open string with a balustrade of round turned balusters and a heavy turned newel with a cannonball pattern. Doors in the basement are four panel cross pattern. The southeast room matches the width and depth of the original house. Brick work indicates that it was two rooms originally. There is a south fireplace with cypress pilasters and shelf built in 1982. A door leads to the exterior on the southwest side of the fireplace. The wall and ceiling are plaster like that of the first and second story. The floor is poured, scored concrete of no particular pattern of blocks dated 1911. Windows are six-over-six sash set into three brick deep foundation.

The southwest room in the basement contains the open brick chimney foundation and features like that of the southeast room. There are two windows with a six-over-six sash. The north wall to this room is three brick thick and opens to a northwest room that had a dirt floor and window on the north side. This room has been converted to a modern bath and utility room.

The only remaining outbuilding is a 1 ½ story wood frame building located southwest of the house. It was originally located about 200 feet from the house but was moved to its current location when the property was sold and subdivided in the 1970s. The date of construction is unknown but it has the same lathing and plaster as the dwelling. It has been recently gutted for restoration and placed on a new brick foundation. Intact is a stairway leading to the second story. Evidence suggests that it was used for a dwelling at one time.

Phillips Farm House was completely restored in 1982-84 leaving intact all original trim, floors and doors, The structural integrity and floor plan of the house was not altered. This house had been vacant and open to the elements for

approximately ten years. The property currently contains six and one half acres of the original 189 acre farm.

=====  
8. Statement of Significance  
=====

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

The Phillips Farm  
Suffolk, Virginia

The significance of the Phillips Farm house is that it is one of a few regional examples of a building commonly called a clerestory house or a clerestory dormer house. The clerestory house is indicated by continuous windows, in a second story, with sills located approximately two feet from the floor offering a one-and-a-half story dwelling. The Phillips Farm is one of 14 ( 12 still standing) clerestory buildings in Southeast Virginia.

Clerestory window features distinguishes the clerestory house from other vernacular domestic dwellings in Virginia and possibly the United States. In the 14 clerestory buildings in Southeast Virginia, the clerestory was fabricated in one of two ways. The most prevalent, with nine examples, is the clerestory dormer which consists of an extended shed dormer with consecutive windows. The other, with five examples, is the clerestory house in which the half story is constructed as a clerestory. Clerestory design, while it is not a full two story design, allows for all the benefits of a full second story with full head room and light capacity. Although the exterior appearance indicates one large room in the clerestory, there are usually two rooms separated by a partition wall that intersects one of the windows. All of the clerestory houses have a definitive side profile ( see attachment). Clerestory houses (or clerestory dormer houses) are found in a four-county region in southeastern Virginia between the James and the Blackwater Rivers. These dwellings appear to have been built C. 1820 through C. 1850. There are fourteen (nine clerestory dormer houses and five clerestory houses) recorded examples of this house type in the counties of Surry, Isle of Wight, Nansemond (now city of Suffolk), and Southampton. The earliest and of a grander scale is the Beale house in Southampton County. There are four in Surry County, eight in Isle of Wight County and one in the City of Suffolk, The Phillips Farm House. Two of the houses have been demolished. To date, research has indicated the clerestory dwelling is confined to these counties. Most of these structures were recorded in the late 1970s, either by the Virginia Historic Landmarks Commission or in local history or pictorial books.

Clerestory dwellings, (as researched by Elizabeth P. Hoge, Graduate Student in Planning, University of Virginia), were probably built by one or two builders who lived in the area. Speculation suggests that the one or two builders may have lived in central Isle of Wight County ranging into Suffolk, Surry and Southampton County. They may have presented the concept of the NPS

United States Department of the Interior  
National Park Service

NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET

Section 8 Page 7

The Phillips Farm  
Suffolk, Virginia

clerestory house to clients and then allowed them to modify to meet individual needs and design. The use of clerestory building design may have originated in New England cotton textile mills where clerestory design was used for lighting in large stone or wood buildings built to accommodate long rows of textile machines. During this same period cotton was a major crop of Virginia and was shipped to New England textile mills. It is noted that none of the clerestory dwellings predate or postdate cotton production of this region in Virginia.

It is one of two houses that exhibit the highest level of craftsmanship of the fourteen recorded dwellings. It was originally a one-story single pile house built on a raised brick basement C. 1820. In 1848 it was raised to a clerestory with a 2/3 Georgian-plan. The front facade is a full clerestory and the rear facade has a salt box roof with a clerestory dormer at each end. It is the largest of the fourteen, with three rooms on the second floor which works as full second story.

Phillips Farm House is the best preserved example of the five documented clerestory house. It is located on Route 10, ten miles north of Suffolk, Virginia. It is the farmhouse for an original 189 acre farm(140 acres were in Nansemond County and 49 acres were in Isle of Wight County) owned in 1826 by John T. Phillips according to land tax records. The heirs of John T. And Elizabeth Phillips sold the estate in 1868. (Due to the burning of Suffolk in 1865 deed records are not available prior to that date). It is known that John and Mary Phillips were married in Isle of Wight County in 1820. He was the Headmaster of a school for young ladies in Chuckatuck (Nansemond County). In 1868, four Phillips children were listed as the heirs selling the property. This was the first of seventeen recorded sales of this house prior to purchase by the current owners.

The Chuckatuck citizens either call the house, The Percy-Pitt house, as the Pitts owned the house off and on from 1888-1926 or the Brown Farm for two bachelor brothers who owned the house from 1943-1971. It is local lore that Percy lost the house and farm because he sat on the front porch talking to anyone who came by instead of attending to managing the farm.

The Phillips Farm House was restored through a two-year project by the current owners in 1982-84. Unoccupied for ten years and open to the elements, it was in a grave state of disrepair. The historical integrity of the house

Verbal Boundary Description: SEE PLAT PLAN ATTACHED.

The boundary of the Phillips Farm is indicated in the accompanying plat labelled "Plat of the property of Carolyn A. Keen and Carroll E. Keen, Sr. and Grace J. Keen parcel of land containing 6.501 acres, City of Suffolk, Va."

Boundary Justification: The boundary includes the farmhouse, outbuilding, and 6.5 acres that historically have been part of Phillips Farm and that maintain historic integrity. Those parcels of the original farm north, west and south of the property have been excluded because they have been subdivided and developed into residential houses.

NATIONAL REGISTER OF HISTORIC PLACES  
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name The Phillips Farm  
other names/site number Percy-Pitt Farm, VDHR #133-0695

2. Location

street & number 6353 Godwin Boulevard not for publication N/A  
city or town Suffolk vicinity N/A  
state Virginia code VA county Independent City code 800 zip code 23432

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this X nomination        request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property X meets        does not meet the National Register Criteria. I recommend that this property be considered significant        nationally        statewide X locally. (       See continuation sheet for additional comments.)

[Signature] May 16, 2006  
Signature of certifying official Date  
Virginia Department of Historic Resources  
State or Federal Agency or Tribal government

In my opinion, the property        meets        does not meet the National Register criteria. (       See continuation sheet for additional comments.)

**8. Statement of Significance**

=====

**Applicable National Register Criteria** (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield information important in prehistory or history.

**Criteria Considerations** (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

**Areas of Significance** (Enter categories from instructions)

Architecture  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Period of Significance** Ca. 1820

**Significant Dates** Ca. 1820; Ca. 1848

**Significant Person** (Complete if Criterion B is marked above) N/A

**Cultural Affiliation** N/A

**Architect/Builder** N/A

**Narrative Statement of Significance** (Explain the significance of the property on one or more continuation sheets.)

=====

**9. Major Bibliographical References**

=====

(Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)

**Previous documentation on file (NPS)**

=====  
**Paperwork Reduction Act Statement:** This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.). A federal agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number.

**Estimated Burden Statement:** Public reporting burden for this form is estimated to average 36 hours per response including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the National Register of Historic Places, National Park Service, 1849 C St., NW, Washington, DC 20240.

Washington D.C. 20005

**RE: Phillips Farm, City of Suffolk, updated mapping**

Dear Ms. Matthews:

The enclosed form for Phillips Farm is to replace the original main form pages sent in and approved with the full nomination on October 30, 1998. Based upon GIS mapping and a site visit, the original Quad mapping and UTM points were discovered to be incorrect with the property parcel. As such, this form corrects the UTM points, as well as the reference file number on the front page which was also incorrect. Included is a new Quadrangle map, now Bennis Church instead of Chuckatuck. Please replace these parts of the form and mapping with the original nomination.

Should you have any questions, please do not hesitate to contact me. My direct phone line is 804-367-2323 at extension 102.

Sincerely,

Jean McRae  
National and State Register Program Specialist
