Introduction

Agency Background Information

The Civil Aeronautics Board (CAB) was established within the Department of Commerce under Reorganization Plans 3 and 4 of 1940, effective June 30, 1940. The Board was made an independent agency by the Federal Aviation Act of 1958 (72 Stat. 731), effective January 1, 1959.

The CAB was given responsibility for regulating economic aspects of air carrier operations, promulgating safety standards, investigating accidents, and promoting international air transportation. The CAB authorized domestic air carriers to engage in interstate and foreign transportation and regulates the operations of foreign air carriers in the United States. It had jurisdiction over subsidies paid air carriers and over tariffs, rates, and fares charged for air transportation and for carrying the mail. The CAB, which regulated the accounting procedures of air carriers and their financial and business relationships, required the carriers to file regular financial and operating reports and made that data available to other Government agencies and the public.

The Civil Aeronautics Board (CAB) ceased to exist (sunsetting) on December 31, 1984. Beginning on January 1, 1985, air carrier reports were handled by the Department of Transportation (DOT), Research and Special Programs Administration (RSPA), Office of Aviation Information Management.

National Archives (NA) Background Information

At one time the National Archives operated a depository for non-archival machine-readable records of high current interest, which have been made, received, or acquired by Federal agencies. Under the terms of inter-agency agreements of September 9, 1977, January 2, 1979, November 14, 1979, and March 25, 1982, CAB transferred copies of many of its machine-readable data files to the physical custody of the National Archives. The National Archives offered reference on these data files.

These records were not appraised at the time they were deposited in the National Archives. In 1982 and 1983, these records were scheduled and many appraised as permanent in Jobs NC1-197-82-1 and NC1-197-83-1. In April 1986, RSPA signed Standard Form (SF) 258,

NARA's web site is <http://www.nara.gov>

"Request to Transfer, Approval, and Receipt of Records to National Archives of the United States" this action started the process to formalize the change in status of the permanent machine-readable files produced by the CAB which were now under RSPA's jurisdiction. The SF 258 [NN3-197-89-1](Attachment 1) covers the formal transfer of all permanent machine-readable files CAB produced through December 1984. The attachment to the SF 258 lists the files/surveys; Request for Records Disposition Authority (SF 115) citation, source/producer of the file, number of reels, and "permanent" inclusive dates. (See Attachment 2)

National Archives Processing Information

Terms

Accession Number: A National Archives assigned number for agency's permanent records, that are transferred to the legal and physical custody of NARA. (Example: NN3-197-89-1)

Control Number: These numbers are based on the attachment to the SF 258 (Attachment 2). Some series have the same title but the control number and date span will be different. In these instances, this indicates to the user that there was a change in the record layout.

Record Group (RG): A body of organizationally related records established by an archival agency after considering the organization's administrative history and complexity and the volume of its records. The National Archives uses record group numbers to keep track of agency records during and after the scheduling process, including those transferred to Federal records centers and/or the National Archives.

RG197: Records of the Civil Aeronautics Board

RG 467: Records of the Research and Special Programs Administration
(Transportation)

Series Title: Obtained from information on CAB Master Data File Description or the "survey" title listed on the attachment to the SF 258 covering [NN3-197-89-1].

When the National Archives decided to formally accession the files warranting long-term preservation, validation and preservation work started. Because of the large number of files requiring preservation (677 magnetic tapes), there was a reluctance to approve the SF 258 without some preliminary validation and preservation work. Based on this preliminary work, the Machine-readable Branch (NNXA) decided to approve the SF 258 in June 1989. It was anticipated that NNXA might encounter some problems with a few tapes, but would be able to secure another copy of the file or would be able to document the problems sufficiently to support reference use of the files.

There are numerous data sets covered by accession NN3-197-89-1. If the National Archives was able to successfully copy the data set and if adequate documentation existed and there are no major discrepancies between the data and the documentation then these data sets are included in this documentation package. The documentation package is divided into surveys/series. (Please see Attachment 2) Each survey is assigned a "Control

Number" which is based on the information in the Attachment to the SF 258. Within a series, there may be more than one record layout that applies to the various data sets. If a series/survey has more than one record layout, I assigned different "Control Numbers" e.g., B9a and B9b.

List of Surveys/Series

<u>Control #</u>	<u># of Data Sets</u>	<u>Survey/Series Title</u>
A1a	03	Competition Among Domestic Air Carriers (CADAC)-- Annual Detail
A1b	07	CADAC-- Quarterly Detail
A1c	03	CADAC-- Annual Summary
A1d	13	CADAC-- Quarterly Summary
A2	00	Domestic Air Freight Investigations / Priority Air Freight Investigations (DAFRI/PRAFRI)
A3	01	On Time Performance
A4	01	Denied Boarding
B1	15	Service Segment Data [Data Bank (DB) 23]
B2	04	T-9 Nonstop Market Data [DB 26]
B3	01	Commuter Air Carrier Statistics -- Online Origin & Destination [Form 298-C, Schedule T-1]
B4	01	Commuter Air Carrier Statistics -- Report of Flight and Traffic Statistics [Form 298-C, Schedule A-1]
Total =	49	

<u>Control #</u>	<u># of Data Sets</u>	<u>Survey/Series Title</u>
		Passenger Origin & Destination Survey:
B5	39	Ticket Origin & Destination [DB 1]
B6	25	Ticket Dollar Value Origin & Destination [DB 1A]
B7	04	Origin & Destination Directional Detail -- U.S. Flag {Crossposted}
B8	05	Origin & Destination Directional Detail- Foreign Flag {Crossposted}
B9a	03	Directional Origin & Destination {International/ Territorial} [DB 2A], 1968-1971
B9b	14	Directional Origin & Destination {International/ Territorial} [DB 2A], 1973, 1974 & 1976-1985
B10	16	Directional Detail-Domestic {Crossposted}
B11	14	Directional Origin & Destination {Domestic} [DB 2C], 1972 2nd Quarter - 1985
B11X	03	Directional Origin & Destination {Domestic} [DB 2C] 1968 - 1971
B12	65	City/Airport Nomenclature [DB 5]
Total =	188

		Form 41 Reports -- Traffic & Capacity Data:
B13	01	Schedules T-1, T-1(A), & T-2, Feb. 1961- June 1970
B13X	01	Schedule T-1, March 1974 - Dec. 1980
B14	01	Schedule T-3
B15	01	Schedule T-4
B16a	08	Schedule T-6 and Form 217 Reports, System Analysis & Research Corporation (SARC) Charter Data, 1968-1975
B16b	01	Schedule T-6, Charter Data, April 1976 - Dec. 1979
B16c	02	Schedule T-6, Charter Data (Modified), Oct. 1979 - Dec. 1983
Total =15		

<u>Control #</u>	<u># of Data Sets</u>	<u>Survey/Series Title</u>
		Form 41 Reports -- Financial Data:
B17	01	Schedule B-1
B18	02	Schedules P-1, P-3, P-3(A), & P-6
B19	02	Schedule P-5
B20	01	Schedules P-7 and P-8
B21	02	Schedule P-9
Total =08		

Grand Total = 260

There are documents that are common to all of the completed series, except for Control Number B12, Data Bank 5. Data Bank 5 documentation package was completed prior to my involvement with this project. Please see a separate documentation package covering Data Bank 5, (1969 Quarter 3, 1969 Quarter 4, and 1970 Quarter 2 - 1985 Quarter 4). The rest of the series will include a cover page, table of contents page, agency record description, technical description and supplemental information page, validation statement, codebook list, codebook(s), and sample computer dump(s). Agency documentation varies from series to series.

NA Created Documents Include the Following:

Codebook List: Provides information about the codebooks used during the validation/verification process.

Sample Computer Printouts: One printout for each data file. NARA staff copied the CAB tapes and then produced two NARA created copies. For the most part, the printouts are dumps of some records from the NARA created copies and the printouts are character representation of the bit pattern usually from the first part of each file.

Page 4 (Revised April 16, 2002)

Table of Contents: Provides the control number, list of the documentation and page count for most sections in a series. Under the first National Archives section of the Table of Contents, "Format X" is listed. Please disregard this item, there are no pages for this item in any series. This introduction is another item listed in the Table of Contents; Control Number B7 is the only series that has the page count listed for this item

Technical Description & Supplemental Information Sheet: Provides useful technical information about each series (data set title, data set short title with date coverage, number of logical records, character set and record format). In addition, supplemental information is provided about the inclusive dates of the permanent records. Based on the dates provided on the attachment to the SF 258 (NN3-197-89-1) it would appear that some data sets are missing from this accession; see Control Numbers [A1a, A1b, A1c, A1d, B4, B10, B12, and B19]. During the processing of this accession, all attempts were made to include all the CAB data sets appraised as permanent. If data sets were missing, NARA sought to obtain replacements from RSPA. If NARA had any problems copying all of the records in a data set, an explanation is provided. (See Control Numbers B7 and B11X respectively).

Under ideal circumstances, only permanent records should be included in this accession. There are instances in which data sets outside of "permanent inclusive dates" are included. For example, see Control Number B11X. I determined that if the series existed and NARA was able to make a copy of the data set, then I would included the data in this accession.

NA User Note: Provides information that would be helpful to users of the data. An example is user note "Subject: SAS Frequencies Run on Several Data Elements" Control Number A4.

Validation Statement: Based on a comparison of the data with the available agency documentation, NARA staff validated two records from each data file that NARA had copied. Any discrepancies noted are listed in this document.

Anomalies

1. National Archives staff found a need to create a revised record layout for Denied Boarding (Control Number A4). The National Archives staff created record layout is based on the CAB Record Description.
2. Some records appraised as temporary are included in the documentation package. [Please see Control Numbers B4, B5, B6, B11X, B13, B13X, and B21]
3. Due to a technical problem, the National Archives was not able to successfully copy three data sets listed for Control Number B7. On April 11, 2000, the Archivist of the United States approved the disposal of these data sets.
4. Some series include RSPA data sets (any data set created after December 31, 1984): [Control Numbers B3, B9b, B11, B12, B17, B18, and B20]

5. Domestic Air Freight Investigations / Priority Air Freight Investigations (DAFRI/PRAFRI), Control Number A2 is excluded from this documentation package. During this accessioning process, National Archives staff did not have access to a CAB File Description/record layout for DAFRI/PRAFRI. We did have a copy of a National Archives created record layout "Domestic Air Freight-Priority Air Freight History File" dated December 1979. Unable to obtain a record layout from RSPA, the National Archives record layout was used to validate records in a data set titled DAFRI/PRAFRI. Major discrepancies were encountered during the validation process. Based on information gathered during the validation process, National Archives staff determined that the data set identified as Domestic Air Freight Investigations/ Priority Air Freight Investigations (DAFRI/PRAFRI) July 1976-February 1978, Control Number A2 is not DAFRI/PRAFRI data.

National Archives

Washington, DC 20408

Date: August 20, 1992
From: P. D. Palmer
To: Users of CAB Data

Subject: Codebooks--Data Bank 5 SAS 10% Random Sample

City/Airport Nomenclature, Data Bank 5 (DB5) is an auxiliary file that is used with other files. The file contains alphabetic codes, numeric codes, full name spelling (up to 30 characters), abbreviated name spelling (up to 20 characters), and geographic coordinates for all cities in flight itineraries reported in the Passenger Origin and Destination (O & D) Survey.

In July 1988, National Archives staff member, Michael Meier completed a validation statement that pertained to DB5 files transferred to the National Archives. He used a 10% random sample of the data in DB5 for validation. The variables used in the sample were:

Airport Designator (APRTDSGN).....DB5SAS1
City Airport Code (CTYAPTC).....DB5SAS4
Multiple Airport Alpha (MARPTAPH)....DB5SAS2
Numeric Sequence Code (NUSEQCD).....DB5SAS3
World Area Code (WLDARECD).....DB5SAS5

In his validation statement, Meier stated that "... 65 data sets were machine validated by using SAS and running frequencies on these variables."

According to the information provided in Meier's DB5 documentation package "Users of Data Bank 5 will be able to match code fields to corresponding fields in the other O & D files containing the same coded information. The file was updated quarterly so that it could be used with the historical O & D files. Dates should be the same when using Data Bank 5 with other files." The earliest data of DB5 that was transferred to the National Archives is 1969 Third Quarter. Data for 1970 First Quarter is missing and the Research and Special Programs Administration does not have a copy of this data set. Please note that the pages used as codebooks in this documentation package start with DB5 1973 Third Quarter; this was the earliest data set listed on the SAS sample that I used.

GENERAL SERVICES ADMINISTRATION

*National Archives and Records Service**Washington, DC 20408*

Dear User:

We have received a letter from the Civil Aeronautics Board, dated January 18, 1977, informing us of the following changes in the documentation for their data files:

1. There has been a new carrier group code established. The new code is '07' and is defined as regional. The Carrier Entity Code for Air New England has been changed from '02' to '07'. The complete five (5) character code for Air New England will now be 07027. The change will be effective as of the data for the fourth quarter of 1975, and includes all Form 41 data as well as the Service Segment Files.
2. Documentation for the Service Segment Data file indicates that fields 04 and 07 contain city airport numeric codes which are made up of a city code, an airport designator, and a world area code. In fact, the airport designator is always zero in these two fields. Field 23 which is shown in the original documentation as a two position filler (positions 52 and 53), now contains the airport designators for city/airport (1) and city/airport (2), respectively.

This change is in effect on all data since 1971.

Data on all files covering the fourth quarter of 1975 will show no data for National Airlines due to a strike.

If you have any questions regarding these changes, please contact me at (202) 724-1080.

Sincerely,

A handwritten signature in cursive script that reads "Herman H. Rugen, Jr.".

HERMAN H. RUGEN, JR.
Computer Systems Analyst
Machine-Readable Archives Division

Keep Freedom in Your Future With U.S. Savings Bonds

Notes for All CAB Magnetic Tape Files

1. All Civil Aeronautics Board Magnetic tape files are recorded in 9-track, 800BPI mode with odd parity. They are created on IBM equipment under the IBM Disk Operating System.
2. Where labels are referred to as "standard", it means standard as defined by IBM for its System 360 under the Disk Operating System.
3. On File Definition sheets, under "FILE LABEL INFORMATION", the data between apostrophes is the actual file identification which should appear in the TLBL card when processing the file.
4. Fields with no field description entry are considered self - explanatory.
5. All sort sequences shown are in ascending order unless otherwise specified by the notation "(D)" beside a sort field.
6. Record descriptions contain several columns which require coded entries. The following notes contain the codes and meanings for those columns:

a. Column headed "Justified"

<u>Code</u>	<u>Meaning</u>
R	Data is stored beginning at the rightmost position of the data field and filling to the left. Fill characters occupy any positions at the left which are unfilled by data.
L	Data is stored beginning at the leftmost position of the data field and filling to the right. Fill characters occupy any positions at the right which are unfilled by data.
- (dash)	One position fields or fields which are always completely filled with data.

b. Column headed "Fill Char."

<u>Code</u>	<u>Meaning</u>
␣	Unused data positions filled with the EBCDIC representation of a space.
- (dash)	Field will always be completely filled with data.
any other char.	Unused data positions filled with this character.

c. Column headed "Type of Data"

<u>Code</u>	<u>Meaning</u>
A	Data is alphabetic.
N	Data is numeric.
A/N	Data is alphanumeric.
6	Field always contains blanks.

d. Column headed "Data Representation"

<u>Code</u>	<u>Meaning</u>
Binary	Data is coded in pure binary code.
BCD	Data is coded in binary coded decimal format. (Primarily for files created by the IBM 1401 System).
EBCDIC	Data is coded in extended binary coded decimal interchange code. (An IBM developed code.)
Packed	Data is coded in packed decimal format.

7. For some files, a column may be added to the record description next to either the "Field Name" or the "Description of Data" column. When next to the "Field Name" column it contains an alternate field reference, such as a field number or coded field name as it appears in some common usage of the file (e.g., the Data Division of a COBOL program). When next to the "Description of Data" column it contains a source document item reference, such as a Form 41 account number. This permits easier cross referencing of the record description to the source document.

(4)

Form 41 Reports

Introduction

The Form 41 files contain data in machine readable format identical (with some exceptions) to that filed with the CAB by the carriers on hard copy schedules of the CAB Form 41 pursuant to Part 241 (Uniform System of Accounts and Reports) of the Economic Regulations of the CAB.

The files are separated into two subclassifications; Financial Data and Traffic and Capacity Statistics. Not all schedules filed on hard copy are stored on magnetic tape.

The Financial Data consists of Schedules B-1, P-1.1, P-1.2, P-3, P-3(A), P-5.1, P-5.2, P-6, P-7, P-8, P-9.1, and P-9.2.

Traffic and Capacity Statistics have undergone two stages of development. Originally they consisted of Schedules T-1, T-1(A), T-2, T-3, and T-4. Economic Regulation 586 (ER-586), effective July 1, 1970, contained revised Schedules T-1, T-2, and T-3 which replaced those mentioned above; and a new file called the Service Segment Data file.

The schedule prefix is an indication of the type of data stored on a Form 41 file. "B" (balance sheet) and "P" (Profit and Loss) schedules comprise the Financial Data and "T" (Traffic and Capacity) schedules comprise the Traffic and Capacity Statistics.

Form 41 Reports - Traffic and Capacity Statistics

Introductory Notes

1. Traffic and capacity statistics files have undergone two stages of development. They were originally established in the early 1960's from data reported on Schedules T-1, T-1(A), T-2, T-3, and T-4 as defined in Part 241 of the Economic Regulations of the CAB. The reporting requirements were revised by Economic Regulation 586 (ER-586), effective July 1, 1970, to provide for (1) reporting on Schedules T-1A, T-1B, T-1C, T-2A, T-2B, T-3A, T-3B and T-3C (and their submission on machine readable media), all of which differ materially in format from the earlier similarly identified files; and (2) submission of service segment data on machine readable media.

2. In the first version of traffic and capacity statistics reports, the data items were identified by unique numbers which were called account numbers, although they were not such in the strict accounting sense.

Account numbers occupy five positions of a record. The numbering scheme provides for a four digit account number, to which, on Schedule T-1(A) accounts has been added a suffix which appears on the printed schedule as a decimal point and a single digit following the basic account number. The suffix appears only for accounts under columns headed "Domestic" (suffix 1), "Territorial" (suffix 2), and "International" (suffix 3). The suffix is stored on tape as a fifth digit in the low order position. Accounts in the column headed "Total" have no suffix and the low order position of those accounts on magnetic tape, as well as all other "T" schedule accounts not mentioned above, contains a zero.

3. In the second version, data items are called elements and are identified by element numbers. These numbers consist of an alphabetic prefix, which allows the items to be grouped, and a three digit number.

Prefixes and their meanings are as follows:

<u>Prefix</u>	<u>Type of Service</u>	
A	First class passenger/cargo	} Scheduled Services
C	Coach passenger/cargo	
E	Mixed passenger/cargo	
G	All cargo	
K	Total	
L	Civilian passenger/cargo	} Nonscheduled Services
N	Military passenger/cargo	
P	Civilian all cargo	
R	Military all cargo	
V	Total	
Z	Total - All services	

All elements in the segment data file have the prefix "X".

4. The segment data file was added to the traffic and capacity statistics system in the revisions to Part 241 contained in ER-586 of the Economic Regulations of the CAB. The data are submitted by carriers on machine readable media, with no specific hard copy submission required. Data elements are similar to those found on the various "T" schedules, but usually represent a different level of detail.

5. Comparisons of the "T" schedules under the old and new reporting requirements are as follows:

1. The present Schedule T-1A is approximately equivalent to the old Schedule T-1, with the "Z", "K", and "V" prefixed data elements of the present Schedule T-1A corresponding to the "9000", "5000" and "6000 + 7000" series accounts, respectively.
2. The old Schedule T-1(A) was a breakdown of scheduled and nonscheduled services (as reported on Schedule T-1) into the carriers' domestic, territorial, and international operating components. No such breakdown exists under the new reporting requirements.
3. The present Schedule T-1B is approximately equivalent to the old Schedule T-2 with the 'A', 'C', 'E', and 'G' prefixed data elements of the present Schedule T-1B corresponding to the '1000', '2000', '3000', and '4000' series accounts of the old Schedule T-2.
4. The present Schedule T-1C is a breakdown of nonscheduled service into passenger/cargo and all cargo categories under both civilian and military components. It has no equivalent schedule under the old reporting requirements.
5. The present Schedules T-2A and T-2B are approximately equivalent to the old Schedule T-3. They present a breakdown of traffic and capacity statistics by aircraft type operated by each carrier.
6. The present Schedules T-3A, T-3B and T-3C are approximately equivalent to the old Schedule T-4. They present a breakdown of traffic statistics by airport served by each carrier. Nonscheduled traffic is now reported in greater detail than it was previously.

Some data items have been eliminated, some added, some merged and some modified in the transition from the old to the new reporting system.

Charter Data

Introductory Notes

1. SARC Charter Data¹, compiled by the Systems Analysis and Research Corporation from CAB Form 41 Schedule T-6 and CAB Form 217 data reported by U.S. and Foreign Carriers respectively, was superseded by a file called "Charter Data,"² compiled at the CAB in a new format from revisions of the same forms as of May, 1976. SARC Charter Data through the second quarter, 1976 will continue to be available indefinitely.
2. The revised reporting requirements went into effect with data for the month of May, 1976. However, there are some April data on the file for carriers which preferred to submit a complete quarter of data in the revised formats. Data for the first few months contains significantly higher numbers of errors than subsequent data due to misunderstandings of the revised requirements and reporting instructions.
3. Note that there is a very significant difference in the concept of the itinerary of the aircraft and the itinerary of a charter group. The difference is important to the understanding of the concept of flight legs and their associated data. For example, an aircraft itinerary may encompass points A-B-C-D-E and involve several charter groups. Each charter group may enplane at any of the first four points and deplane at any of the last four. This creates several possible charter itineraries, some of which may be identical or overlapping but must be reported separately since they reflect data on the movement of each identifiable charter group.

¹ SARC Charter Data is a restricted file.

² CAB's Charter file is available to any person without restriction.

**CIVIL AERONAUTICS BOARD
Record Description**

File name: Charter Data

Program which creates record: Number: P495XJ0 Name:

Fixed length
 Variable length. Minimum length 129 Maximum length 1665
 Undefined. Minimum length _____ Maximum length _____

Starting position of variable portion 66 Maximum number of repeating segments 25

Field Number	Field Name	Multi-level Field Relationships (See Note)	Justified	Fill Char.	Starting Position	Field Length	Type of Data	Data Representation	Description of Data
1	Record length	1		R 0	1	2	N	Binary	The number of positions in this record including this field and field 2, which are both generated by the computer software and appended to the data record.
2	Filler	1		- "	3	2	"	Binary	Always contains zeroes.
3	Year of reporting period	2		- -	5	2	"	EBCDIC	Low order (rightmost) two digits of the year of the reporting period.
4	Month of reporting period	2		R 0	7	2	"	"	Standard two digit month code. Values "01" through "12".
5	Quarter of reporting period			- -	9	1	"	"	A value "1", "2", "3", or "4" indicating the quarter of the reporting period.
6	Carrier code			1, 5	10	3	A	"	2 letter codes appearing in the Official Airline Guide where assigned, or 3 letter codes assigned by the CAB if OAG codes not available. See note 1.
7	Carrier class			- -	13	1	N	"	A code "1", "2", "3", or "4" indicating U.S. Route, U. S. Supplemental, foreign route or foreign charter carrier, respectively.
8	Carrier nationality			R 0	14	2	"	Packed	The world area code of the country of the carrier.
9	Flight number			0	16	7	A/N	EBCDIC	The identifying code assigned to the flight by the carrier, or as modified by the CAB.
10	Principal aircraft type			" "	23	3	N	"	Code for the aircraft type which flew the longest leg of the entire flight itinerary. See Table 4 of Section B of this manual.
11	Schedule reference starting page	3		" "	26	3	"	"	The page number of the source document from which the data were taken for the first (or only) leg of this flight.
12	" " starting line	3		" "	29	2	"	"	The line number on the page shown in field 11 from which the data were taken for the first (or only) leg of this flight.
13	" " stopping page	4		" "	31	3	"	"	The page number of the source document from which the data were taken for the last (or only) leg of this flight.
14	" " stopping line	4		" "	34	2	"	"	The line number on the page shown in field 13 from which the data were taken for the last (or only) leg of this flight.
15	Repeating record segment count			R 0	36	2	"	Packed	The no. of repeating record segments beginning at position 66. It is equal to the no. of charter group flight legs transported on this flight itin.
16	Aircraft miles			" "	38	4	"	"	Total aircraft miles for this flight itinerary. See note 3.
17	Available seat-miles			" "	42	5	"	"	Summation of the products of seats contracted for and nonstop distance for each charter group flight leg moving on the flight itinerary.
18	Revenue passenger-miles			" "	47	5	"	"	Summation of the products of passengers enplaned and nonstop distance for each charter group flight leg moving on the flight itinerary.
19	Available ton miles			" "	52	5	"	"	Summation of the products of available tons and nonstop distance for each charter group flight leg moving on the flight itinerary.
20	Revenue ton miles			" "	57	5	"	"	Summation of the products of enplaned tons and nonstop distance for each charter group flight leg moving on the flight itinerary.
21	Revenue			" "	62	4	"	"	Summation of carrier revenues for all charter group flight legs on this flight itinerary in U. S. dollars.
<p>The following fields comprise a repeating record segment containing data and may occur as many as 25 times. Field numbers and starting positions apply to only the first of the repeating segments. Additional ones must be calculated for one charter group flight leg. They may occur at least once in every record.</p>									
22	Schedule reference page number	5		R 0	66	3	N	EBCDIC	The number of the page of the source document from which the data for the charter group flight leg of this record segment were taken.

Note: All fields are elementary data items. These columns indicate logical groupings of items to form larger items. Fields with same number in same column can be grouped.

CIVIL AERONAUTICS BOARD Record Description										File name: Charter Data	
<input type="checkbox"/> Fixed length _____ <input type="checkbox"/> Variable length. Minimum length <u>129</u> Maximum length <u>1665</u> <input type="checkbox"/> Undefined. Minimum length _____ Maximum length _____										Program which creates record: Number: P495X30 Name: _____ Starting position of variable portion <u>66</u> Maximum number of repeating segments _____	
Field Number	Field Name	Multi-level Field Relationships (See Note)	Justified	Fill Char.	Starting Position	Field Length	Type of Data	Data Representation	Description of Data		
23	Schedule reference line number	5	R	Ø	69	2	N	EBCDIC	The number of the line on the page shown in field 22 from which the data for the charter group flight leg of this record segment were taken.		
24	Type of charter		-	-	71	2	A	"	See note 4.		
25	Aircraft type		R	Ø	73	3	N	"	Code for the aircraft type which flew the charter group flight leg reported in this record segment. See Table 4 of Section B of this manual.		
26	Flight leg type for charter group		-	-	76	1	"	"	See note 5.		
27	Day of departure		R	Ø	77	2	"	"	Day of the month this charter group flight leg departed the origin. See note 6.		
28	Charter group flight leg origin city/airport alpha code		-	-	79	3	A	"	Standard three letter city code as found in Table 1 of Section B of this manual.		
29	Charter group flight leg origin city/airport numeric code	6	R	Ø	82	5	N	"	A code which corresponds to the alphabetic name spelling, for sequencing purposes. See Table 1 of Section B of this manual.		
30	Charter group flight leg origin airport designator	6	-	-	87	1	"	"	A code which differentiates between airports of a multiple-airport city.		
31	Charter group flight leg origin world area code		R	Ø	88	3	"	"	A code which indicates in what specific area of the world the city is located. See note 2.		
32	Charter group flight leg destination city/airport alpha code		-	-	91	3	A	"	See field 28 description.		
33	Charter group flight leg destination city/airport numeric code	7	R	Ø	94	5	N	"	" " 29 "		
34	Charter group flight leg destination airport designator	7	-	-	99	1	"	"	" " 30 "		
35	Charter group flight leg destination world area code		R	Ø	100	3	"	"	" " 31 "		
36	Charter group flight leg origin world area classification		"	"	103	2	"	"	A code which indicates in what general area of the world the point of enplanement of this charter group flight leg is located. See note 2.		
37	Charter group flight leg destination world area classification		"	"	105	2	"	"	See field 36 description.		
38	Country of Charter Origin		"	"	107	2	"	Packed	The world area code of the country of charter group origin. See note 2.		
39	Interarea classification		"	"	109	2	"	EBCDIC	See note 2.		
40	Nonstop distance		"	"	111	3	"	Packed	The distance between the charter group flight leg origin (field 28) and charter group flight leg destination (field 32) as calculated from their geographic coordinates.		
41	Number of seats contracted for		"	"	114	3	"	"	The number of seats contracted for by the charter group on this flight leg.		
42	Passengers enplaned		"	"	117	3	"	"	The number of passengers boarding the aircraft at the charter group flight leg origin (field 28).		
43	Available tons		"	"	120	3	"	"	The total capacity (weight) in tons to the nearest tenth available on this flight leg on cargo charters. (Always zero for passenger charters.)		
44	Enplaned tons		"	"	123	3	"	"	The total weight of the cargo, in tons to the nearest tenth, enplaned at the charter group flight leg origin (field 28). (Always zero for passenger charters.)		
45	Charter group flight leg carr. revenue		"	"	126	4	"	"	Carrier revenue attributed to the charter group on this flight leg, in U. S. dollars.		

Note: All fields are elementary data items. These columns indicate logical groupings of items to form larger items. Fields with same number in same column can be grouped.

Notes

1. OAG codes are two letter codes. Codes assigned by the CAB are three letter codes which always end in "Q".

Carrier codes and associated names are shown on the following two pages.

The column labeled "Num. Code" actually consists of two numeric codes. The high order three digits are the true world area code of the nationality of the carrier. (see Table 4 of Section B of this manual, copy attached).

The low order (rightmost) digit is a code indicating the carrier class. Carrier class codes are as follows:

<u>Code</u>	<u>Meaning</u>
1	U.S. scheduled route carrier
2	U.S. supplemental carrier
3	Foreign route carrier
4	Foreign charter

2. World Area codes within the records are the same as they appear on the world area code list for the Passenger Origin & Destination Survey. However, a restructuring of some world areas is accomplished for charter data, as follows: (Note - These are not physical changes to the record, but rearrangement by program routines for output purposes).

Area 1.

Remove 148 - Mexico, 160 - Panama Canal, 174 - San Andres Island.

Area 2.

Remove 268 - Puerto Rico, 283 - Virgin Islands (U.S.).
Combine 235 - Guadeloupe (France) and 252 - Martinique (France) into French Caribbean (new subarea).

Area 3.

Combine 174 - San Andres Island with 327 - Colombia.

Area 4.

Combine 975 - Greenland with 419 - Denmark.
Combine 506 - Canary Islands with 482 - Spain.
Combine 507 - Cape Verde Islands, 561 - Principe, 540 - Madeira Islands, and 567 - Sao Tome with 469 Portugal.
Include 611 - Cyprus and 679 - Turkey in Area 4.

Area 5.

Remove 506 - Canary Islands, 507 - Cape Verde Islands, 540 - Madeira Island, 561 - Principe Island, 567 - Sao Tome Island.
Combine 513 - Comoro Islands, 525 - French Somaliland, and 563 - Reunion Island (France) into French Africa (new subarea).

Area 6.

Remove 611 - Cyprus, 679 - Turkey.

Area 7.

Combine 705 - Bonin Islands (Japan) and 761 - Okinawa, Ryukyu Island (Japan) with 736 - Japan.
Combine 741 - Kurile Island (U.S.S.R.) with 786 - U.S.S.R.

Area 8.

Remove all U.S. possessions (800, 807, 809, 826, 834, 841, 842, 843, and 888).
Combine 803 - Christmas Island (Australia), and 812 - Cocos Islands (Australia), with 802 - Australia.
Combine 852 - Niue (New Zealand) with 851 - New Zealand
Combine 823 - French Polynesia (France), 840 - Loyalty Islands (France), 846 - New Caledonia (France), and 890 - Wallis and Futuna Islands (France) into French Pacific (new subarea).

- Area 9.
Remove 975 - Greenland.
- Area 10.
No change.
- Area 11.
New area comprised of 160 - Panama Canal, 268 - Puerto Rico,
and 283 - Virgin Islands (U.S.).
- Area 12.
New area comprised of Area 8 U.S. possessions.
- Area 13.
New area comprised of 148 - Mexico.

World area classifications (appearing in fields 36 and 37) resulting from the above restructuring are as follows:

<u>World Area Classification Code</u>	<u>Meaning</u>
01	Middle America
02	Caribbean
03	South America
04	Europe
05	Africa
06	Middle East
07	Far East
08	Australia & Oceania
09	Canada
10	U. S. (50 States)
11	U. S. points in Caribbean & Central America
12	U. S. points in Pacific
13	Mexico

By use of the above world area classification codes an inter-area code is created based on the origin and destination of each charter group movement. Inter-area codes are as follows (in either direction):

<u>Code</u>	<u>Origin - Destination Combination</u>	<u>World Area Code Combinations (as reconstituted)</u>
01	U.S. - Middle America	10,11,12 - 01
02	U.S. - Caribbean	10,11,12 - 02
03	U.S. - South America	10,11,12 - 03

<u>Code</u>	<u>Origin - Destination Combination</u>	<u>World Area Code Combinations (as reconstituted)</u>
04	U.S. - Europe	10,11,12 - 04
05	U.S. - Africa	10,11,12 - 05
06	U.S. - Middle East	10,11,12 - 06
07	U.S. - Far East	10,11,12 - 07
08	U.S. - Australia & Oceania	10,11,12 - 08
09	U.S. - Canada	10,11,12 - 09
10	U.S. - U.S.	{ 10 - 10 11 - 11 12 - 12 }
11	U.S. - U.S. Caribbean/Central America	10 - 11
12	U.S. - U.S. Pacific	10 - 12
13	U.S. - Mexico	10 - 13
55	Non-U.S. - Non-U.S. (U.S. Carrier)	non- { 10 11 12 } - non- { 10 11 12 }
99	Unknown	Unknown

3. Total aircraft miles are computed as follows:

- a. Eliminate duplicate points among the flight legs to reduce the charter flight to one set of unique points.
- b. Compute distances from each flight leg origin remaining (after the elimination of duplicates) to each flight leg destination. Find the total distance for each flight leg origin. Using the flight leg origin associated with the greatest aggregate distance as the charter origin, calculate the distance from that flight leg origin to the other flight leg origins, then arrange all points in ascending order of distance from the selected origin. Compute distances from point to point in that sequence and sum these distances to arrive at total aircraft miles.

	<u>Examples Flight Legs</u>	<u>Unduplicated Points</u>	<u>Sequence</u>
1)	WAS - NYC NYC - LHR LHR - PAR PAR - FRA	WAS - NYC - LHR - PAR - FRA	WAS - NYC - LHR - PAR - FRA
2)	WAS - NYC WAS - LHR WAS - PAR LHR - PAR	WAS - NYC - LHR - PAR	WAS - NYC - LHR - PAR
3)	WAS - NYC WAS - FRA NYC - LHR LHR - PAR	WAS - NYC - FRA - LHR - PAR	WAS - NYC - LHR - PAR - FRA

	<u>Examples</u> <u>Flight Legs</u>	<u>Unduplicated</u> <u>Points</u>	<u>Sequence</u>
4)	WAS - LHR BAL - LHR BAL - PAR LHR - PAR	WAS - LHR BAL - - PAR	WAS - BAL - LHR - PAR

4. Charter type codes are as follows:

<u>Code</u>	<u>Meaning</u>
AB	Advance Booking
CP	Common Purpose (Canada and Yugoslavia originations)
EC	Entity - Cargo
EF	Entity - Cargo Forwarder
EP	Entity - Passenger
FT	Foreign Rule Inclusive Tour
IT	Inclusive Tour (Part .378 of the Board's Special Regulations)
OM	Overseas Military Personnel
OT	One Stop Inclusive Tour (Part 378a of the Board's Special Regulations)
PR	Pro Rata Prior Affinity (Includes Mixed Charters)
SE	Special Event
SG	Study Group
TG	Travel Group

5. Flight leg codes are as follows:

<u>Code</u>	<u>Meaning</u>
1	One-way flight
2	Originating leg of round trip
3	Intermediate leg involving a stopover. (Applies only where a group made a distinguishable stopover, not just, e.g. a stop for refueling or entry inspection)
4	Return leg of a round trip.

6. Field 27 will normally contain a number from 1 to 31 (not greater than the last day of the month in which the charter flight departed). However if a charter flight departs near the end of a month, some of the charter group flight legs may depart after the beginning of the next month. In order to be able to extract all data for charter flights occurring in a particular time period those charter flights which extend into the next month have the days of the second month renumbered to appear as a continuation of the first month. For example a charter flight departing on June 30 and with charter group flight legs departing on July 1 and July 2 would appear in the file as three charter group flight legs with days of departure of 30, 31, and 32 respectively.

TECHNICAL DESCRIPTION & SUPPLEMENTAL INFORMATION

Data Set Title: Form 41 Reports--Traffic & Capacity Data:
Schedule T-6, Charter Data

Validation Statement
Form 41 Reports-- Traffic & Capacity Data:
Schedule T-6, Charter Data

According to the information that was available during the validation procedure, we have determined that one data set of Form 41 Reports--Traffic & Capacity Data: Schedule T-6, Charter Data was transferred to the National Archives. This data set has been validated.

The validation procedure involved the manual comparison of the Civil Aeronautics Board (CAB) Master Data File Description with two records from this data set. The results of the validation are as follows:

Do discrepancies occur between the records and the CAB Master Data File Description?

- Yes No Record Format
- Yes No Record Length
- Yes No Starting Position
- Yes No Field Length
- Yes No Type of Data
- Yes No Data Representation

Yes No During the validation procedure, was all of the essential documentation available in order to validate the codes?

--- For data elements "Charter group flight leg origin city/airport numeric code" (field #29) "Charter group flight leg destination city/airport numeric code" (field #33) and "Charter group flight leg destination airport designator" (field #34) the codebooks available are the quarterly Passenger Origin and Destination Survey: City/Airport Nomenclature (Data Bank 5) electronic files. National Archives staff member, Michael Meier ran a 10% random sample of the data in Data Bank 5. Using SAS, Meier ran frequencies on the following variables: Airport Designator; City Airport Code; Multiple Airport Alpha; Numeric Sequence Code; and World Area code. Printouts of the random sample was used during this validation process.

Validation Statement
Form 41 Reports--Traffic & Capacity Data:
Schedule T-6, Charter Data

Were there discrepancies noted between the codes in the records and the codes listed in the data file description, codebook, notes, and/or notices?

Yes No NA Under column "Description of Data"

Yes No NA On File Description Notes
--- For data elements "Charter group flight leg origin world area code" (field #31) and "Country of Charter Origin" (field #38) the value "000" appears in one record, and this is not a value listed in the notes.

Yes No NA In codebooks
--- For data elements "Charter group flight leg origin city/airport alpha code" (field #28) and "Charter group flight leg destination city/ airport alpha code" (field #32) some values, for example, "SGL" and "SUU" do not appear in the codebook.

---For data element "Carrier Nationality" (field # 8) the value "00" does not appear in the codebook.

Yes No NA In memoranda to users of the data

Yes No NA..... In Data Bank 5 SAS 10% Random Sample CAB Validation
--- For data element "Charter group flight leg origin city/airport numeric code" (field #29) the value "00000" does not appear in the random sample printout.
--- For data element "Charter group flight leg destination city/airport numeric code" (field #33) the value "91240" does not appear in the random sample printout.

Shannon Smith revised this validation statement on February 25, 1992.

P. D. Palmer reviewed this validation statement on 2/26/92.

CODEBOOK LIST

DATA SET TITLE: Form 41 Reports--Traffic & Capacity Data:
Schedule T-6, Charter Data

	<u>FIELD NAME</u>	<u>TYPE OF DATA</u>	<u>CODEBOOK TO USE</u>
<u>25</u>	Aircraft type	N.....	ADPATC
<u>8</u>	Carrier nationality.....	N.....	WAC91
<u>34</u>	Charter group flight leg destination airport designator.....	N.....	DB5SAS1
<u>32</u>	Charter group flight leg destination city/airport alpha code.....	A.....	OAGCAC

APPENDIX
OF
AIRCRAFT TYPE
CODES

Page 2 of 10

8-1.0

AIRCRAFT TYPE CODES

This Appendix sets forth types of aircraft for reporting purposes and provides codes for reporting service segment and Form 41 data on ADP media.

General aircraft groupings, aircraft types, and cabin configuration shall be indicated by a four-digit code as follows: aircraft group (one-digit code in the high order position), aircraft type (two-digit code in intermediate positions), and cabin configuration (one-digit code in low order position). Thus, a Boeing 747 aircraft in passenger configuration would be coded as jet, four-engine (8), aircraft type (16) and configuration (1), and would be written as 8161.

The codes to be used are:

<u>Aircraft Group (High order position)</u>	<u>Code</u>
Piston, 1-engine	0
Piston, 2-engine	1
Piston, 4-engine	2
Helicopter/STOL	3
Turbo-prop, 1- and 2-engine	4
Turbo-prop, 4-engine	5
Jet, 2-engine	6
Jet, 3-engine	7
Jet, 4-engine	8

<u>Cabin Configuration (Low order position)</u>	<u>Code</u>
Passenger-only cabin configuration	1 (See Notes 1
Cargo-only cabin configuration	2 Through 3
Combination cargo-passenger cabin configuration	3 Page 8-10.0.

AIRCRAFT TYPE CODES (CONT'D)

Notes:

1. Passenger-only cabin configuration, Code 1:

Use Code 1 for all aircraft commonly used in passenger cargo service where the above-deck cabin is reserved exclusively for the carriage of passengers.

2. Cargo-only cabin configuration, Code 2:

Use Code 2 for aircraft configured for provision of all-cargo services.

3. Combination cargo-passenger cabin configuration, Code 3:

Use Code 3 in those rare circumstances where the above-deck cabin is physically divided by a barrier with one portion containing seats for the carriage of passengers and another portion exclusively reserved for the carriage of cargo. (Do not confuse this configuration with the common above/below deck configuration which is Code 1.)

4. The three-digit ADP Aircraft Codes listed on previous pages include the aircraft Group Code (in the high order position) as well as the Aircraft Type and Model Code. Therefore, only an appropriate Cabin Configuration Code need be added to complete the four-digit code.

CIVIL AERONAUTICS BOARD

BUREAU OF ACCOUNTS AND STATISTICS

PASSENGER ORIGIN-DESTINATION DIRECTIVES

NO.: 9

ISSUE DATE: November 16, 1972

EFFECTIVE

DATE:

October 1, 1972

Section

V and IX

Subsection

D C

Paragraph

3a

SUBJECT: List of Valid City/Airport Codes for Fourth Quarter 1972
Passenger O & D Survey Report

We are transmitting the enclosed list of three-letter city/airport codes for your information and use in preparing your company's passenger origin-destination survey report for the fourth quarter of 1972. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the punched cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the three months of the quarter. In your processing of survey data, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such a point which may appear in the Guides for any month of the fourth quarter. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the fourth quarter 1972 to this Bureau must itemize any such code assignments which your company has made.

W. Fletcher Lutz
Director, Bureau of
Accounts and Statistics

Enclosures (2):

List of city/airport codes, and
Deck of supporting punched cards
unless sent to addressee below:

CITY/AIRPORT CODES FOR THE FOURTH QUARTER 1972
 CAB PASSENGER ORIGIN-DESTINATION SURVEY

CIVIL AERONAUTICS BOARD

BUREAU OF ACCOUNTS AND STATISTICS

PASSENGER ORIGIN-DESTINATION DIRECTIVES

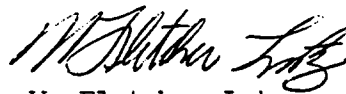

NO.: 10 ISSUE DATE: February 8, 1973 EFFECTIVE DATE: January 1, 1973

Section V and IX
Subsection D C
Paragraph 3a

SUBJECT: List of Valid City/Airport Codes for First Quarter 1973
Passenger O & D Survey Report

We transmit the enclosed list of three-letter city/airport codes for your information in preparing your company's passenger origin-destination survey report for the first quarter of 1973. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the punched cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the first two months of the quarter. In your processing of survey data for the quarter, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such a point which may appear in the Guides for any month of the first quarter of 1973. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the first quarter 1973 to this Bureau must itemize any such code assignments which your company has made.

W. Fletcher Lutz
Director, Bureau of
Accounts and Statistics

Enclosures (2):
List of city/airport codes, and
Deck of supporting punched cards
unless sent to addressee below:

BUREAU OF ACCOUNTS AND STATISTICS

PASSENGER ORIGIN-DESTINATION DIRECTIVES

NO.: 13

ISSUE DATE: May 14, 1973

EFFECTIVE
DATE: April 1, 1973

Section V and IX
Subsection D C
Paragraph 3a

SUBJECT: List of Valid City/Airport Codes for Second Quarter 1973
Passenger O & D Survey Report

We transmit the enclosed list of three-letter city/airport codes for use in the preparation of your company's passenger origin-destination survey report for the second quarter of 1973. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the first two months of the quarter. In your processing of survey data for the quarter, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such point which may appear in the Guides for any month of the second quarter of 1973. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the quarter to this Bureau must itemize any such code assignments which have been made.

W. Fletcher Lutz
Director, Bureau of
Accounts and Statistics

FEBRUARY 1991

FEB. 1991

INTRODUCTION:

This document contains the numeric "World Area Codes" used to identify geopolitical areas such as, countries, states (U.S.), provinces (Canada), and territories or possessions of certain countries. The codes are used within the various data banks maintained by the Office of Airline Statistics (OAS). This document will be updated and reissued on a yearly basis. Users may also access ROSCOE member "LL.WAC" to display any interim changes.

For further information, or to request that your name be added to the distribution list, contact Vicki Bradford, Room 4125, telephone: 366-4393.

AREA 1 - MIDDLE AMERICA

- 106 - Belize
- 110 - Costa Rica
- 118 - El Salvador
- 127 - Guatemala
- 131 - Honduras
- 148 - Mexico
- 153 - Nicaragua
- 162 - Panama Republic

AREA 2 - CARIBBEAN, BAHAMAS, and BERMUDA

- 202 - Anguilla, BWI-UK
- 204 - Bahamas
- 205 - Barbados
- 206 - Antigua and Barbuda
- 207 - Bermuda-UK
- 219 - Cuba
- 221 - Dominica
- 224 - Dominican Republic
- 233 - Cayman Islands, BWI-UK
Includes: Grand Cayman, Cayman Brac, Little Cayman
- 235 - Guadeloupe-France
Includes: French Antilles
- 238 - Haiti
- 243 - Jamaica
- 252 - Martinique-France
- 256 - Montserrat, BWI-UK
- 259 - Netherlands Antilles-Netherlands
- 273 - Grenada & South Grenadines (Includes Carriacou)
- 275 - St. Kitts and Nevis
- 276 - St. Lucia
- 277 - Aruba */
- 279 - St. Vincent & North Grenadines
Includes: Union Island, Mustique, Palm Island
- 280 - Trinidad & Tobago
- 281 - Turks & Caicos Islands - UK
Includes: Providenciales
- 282 - Virgin Islands -UK

*/ A "Constitutional Conference Agreement on Separate Status" was granted to Aruba by the Dutch on January 1, 1986 with a target date of 1996 for its official independence. While it has not yet become "officially independent", it has been given a unique code in recognition of its current status.

AREA 3 - SOUTH AMERICA

- 303 - Argentina
- 312 - Bolivia
- 316 - Brazil
- 324 - Chile
- 327 - Colombia
 - Includes: San Andres Island
- 337 - Ecuador
- 340 - Falkland Islands-UK
- 344 - French Guiana-France
- 350 - Guyana
- 365 - Paraguay
- 368 - Peru
- 379 - Surinam
- 385 - Uruguay
- 388 - Venezuela

AREA 4 - EUROPE

- 401 - Albania
- 402 - Andorra
- 403 - Austria
- 409 - Belgium
- 411 - Bulgaria
- 417 - Czechoslovakia
- 419 - Denmark
- 425 - Finland
- 427 - France
 - Includes: Corsica
- 428 - 1/
- 429 - Germany 1/
- 430 - 1/
- 431 - Gibraltar-UK
- 433 - Greece
- 437 - Hungary
- 439 - Iceland
- 441 - Ireland (Eire)
- 450 - Italy
- 454 - Luxembourg
- 456 - Malta
- 458 - Monaco
- 461 - Netherlands
- 465 - Norway
- 467 - Poland
- 469 - Portugal
 - Includes: Azores, Madeira Islands
- 473 - Romania
- 479 - San Marino
- 482 - Spain
 - Includes: Balearic Islands, Canary Islands
- 484 - Sweden
- 486 - Switzerland
- 489 - U.S.S.R. (European Part) 2/
- 493 - United Kingdom
 - Includes: Channel Islands, England, Hebrides, Northern Ireland, Scotland, Shetland Islands and Wales
- 497 - Yugoslavia

1/ East and West Germany reunited into a single state effective October 1990.

2/ Demarcation Line between U.S.S.R. in Europe and U.S.S.R. in Far East: Ural Mountains, and Western Boundary of Kazakh S.S.R and Caspian Sea.

AREA 5 - AFRICA

500 - Algeria
502 - Angola
503 - Burundi
504 - Cameroons
507 - Cape Verde Islands
509 - Central African Republic
510 - Botswana
511 - Chad
513 - Comoro Islands
515 - Congo
517 - Zaire
519 - Benin (Dahomey)
521 - Equatorial Guinea
522 - Ethiopia
525 - Djibouti
526 - Gabon
527 - The Gambia
529 - Ghana
531 - Guinea
533 - Ivory Coast
535 - Kenya
536 - Lesotho
537 - Liberia

 Territories and
 Possessions 2/

1/ New Code

2/ Previously WAC 800, 807, 809, 826, 834, 841, 842, and 888.

Retired World Area Codes As of January 1, 1989

The following World Area Codes were previously assigned to the locations named, but have been changed to reflect the "Current World Area Code", effective as indicated.

<u>Retired World Area Code</u>	<u>Current World Area Code</u>	<u>Effective Date</u>
160 - Panama Canal Zone	162	1/80
174 - San Andres Island	327	1/89
209 - Carriacou	273	1/83
210 - Cayman Brac	233	1/85
234 - Grand Turk	281	1/85
257 - Mustique	279	1/89
261 - Nevis	275	1/85
266 - Palm Island	279	1/89
267 - Providenciales	281	1/89
268 - Puerto Rico	003	1/89
274 - Antigua <u>1/</u>	206	1/84
283 - Virgin Islands	004	1/89
428 - East Germany	429	10/90
430 - Berlin	429	10/90
506 - Canary Islands	482	1/89
532 - Ifni-Morocco <u>2/</u>	548	1/89
540 - Madeira Islands	469	1/89
561 - Principe Island	567	1/77
594 - Burkina Faso <u>3/</u>	593	1/89
599 - Zimbabwe <u>4/</u>	565	1/89
667 - Peoples Democratic Republic of Yemen	694	5/90

-
- 1/ WAC 206-Barbuda changed to "Antigua & Barbuda" in 1983, but WAC 274 was not dropped until 1984.
 - 2/ Ifni-Morocco inadvertently dropped due to typographical transposition of codes with Ivory Coast effective 1/83. Actual consolidation in Master Coordinate File effective 1/89, however.
 - 3/ Burkina Faso (formerly Upper Volta) should have retained WAC 593 but was assigned 594 in 1986. Corrected 1/89.
 - 4/ Zimbabwe (formerly Rhodesia) should have retained WAC 565 but was assigned WAC 599 in 1981. Corrected 1/89.

WORLD AREA CODES FEB. 1991

Retired World Area Codes As of January 1, 1989 (continued)

705 - Bonin Islands	736	1/89
759 - North Vietnam	791	1/77
